

FA-5 Appendix: Marshall Health Pilot Grant Program

Marshall Health Pilot Grant Awards January 2013

Pilot Trial: Feasibility and Safety of Nutritional Supplementation with Omega-3 Fatty Acids to Reduce Prostate Specific Antigen Rise in Men with Biochemical Failure after Prostatectomy or External-Beam Radiotherapy

PI W. Elaine Hardman, Ph.D.
Dept. of Biochemistry and Microbiology
Co-PI James R. Jensen, MD,
Department of Surgery

Investigate the distribution of segmented filamentous bacteria (SFB) in American children and the presence of SFB with children diseases

PI Hongwei D Yu, PhD.
Dept. Biochemistry and Microbiology
Co-PI Yoram Elitsur, MD. Dept. Pediatrics

Chemotherapy resistance and sensitivity testing in tumors of the central nervous system

PI Pier Paolo Claudio, MD, PhD
Department of Biochemistry and Microbiology
Co-PI Anthony Alberico, MD
Department of Neuroscience

Perivascular Far Relation to hypertension- Appalachian Heart Study

PI Nalini Santanam, PhD, MPH
Department of Pharmacology, Physiology, & Toxicology
Co-PI Paulette Wehner, MD
Department /Division: Medicine (Cardiology)

Prenatal Exposure to Heavy Metals and Polycyclic Aromatic Hydrocarbons (PAH) Alter Umbilical Cord Blood Levels of Thyroid Hormone and Vitamin D

PI Monica Valentovic, PhD
Department of Pharmacology, Physiology
and Toxicology
Co-PI Brenda Dawley, MD
Department of Obstetrics and Gynecology

Impact of Technology-based Behavioral Intervention on Molecular and Clinical Parameters in Patients with Type-2 Diabetes

PI Abid Yaqub, MD

Department /Division: Medicine (Endocrinology)

Co-P Nalini Santanam, PhD, MPH

Department of Pharmacology, Physiology, & Toxicology
