

MARSHALL UNIVERSITY ACCELERATED BS/MD PROGRAM

I'M READY.

I AM A DAUGHTER OF MARSHALL.

Marshall University provides highly qualified West Virginia high school students an opportunity to participate in a seven-year accelerated BS/MD program that guarantees acceptance into Marshall's medical school upon successful completion of the undergraduate requirements.

A collaborative program of Marshall University's College of Science
and the Joan C. Edwards School of Medicine

PROGRAM OVERVIEW

The Marshall University Accelerated BS/MD program allows students to complete the requirements for both the Bachelor of Science and Doctor of Medicine program in an accelerated seven-year program:

- Top applicants will be selected and an alternate list ranked as necessary
- **No MCAT required**
- **Guaranteed acceptance into medical school upon successful completion of program requirements**
- **Tuition waiver for the medical school portion of the program**
- Option to participate in honors programs

This program is designed for highly motivated West Virginia high school students who have achieved the required criteria during their high school careers.

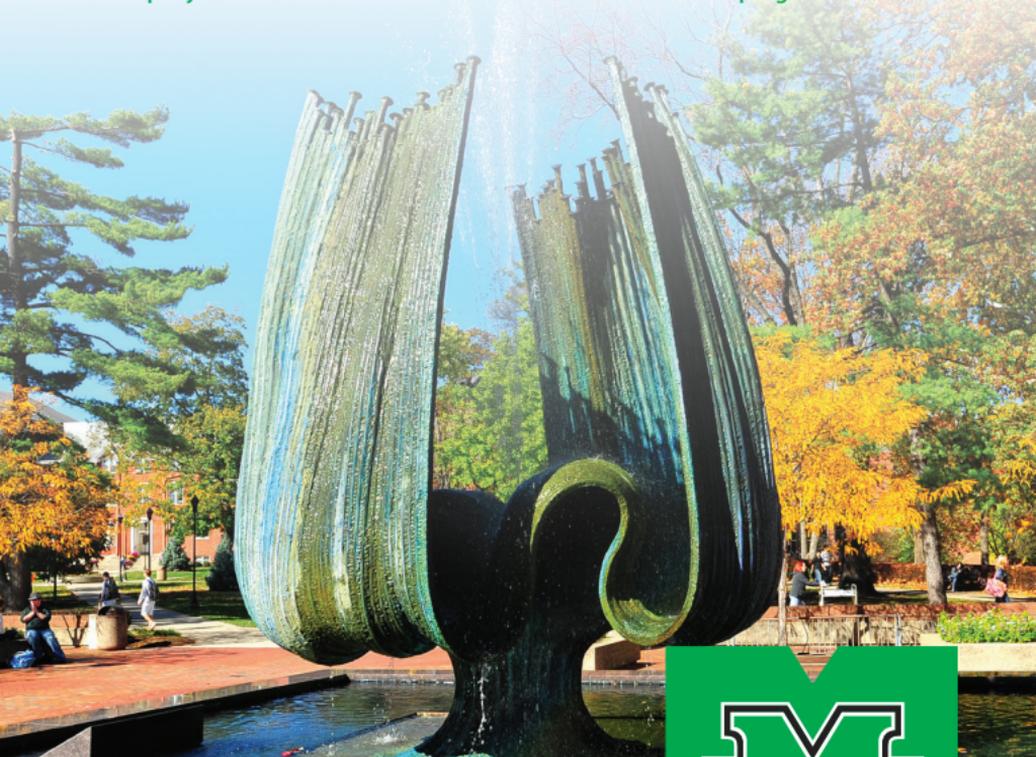

Students will follow an accelerated undergraduate program in biological sciences. Students will receive their bachelor's degrees upon successful completion of their first year of medical school.

Students must meet all admissions requirements established by the medical school in accordance with the BS/MD program.

Students will receive a tuition waiver for medical school. Undergraduate tuition, fees and other medical school expenses (books, etc.) are the responsibility of the student.

Please see website for Admission and Continuing Requirements:
