Course Length: 4-12 weeks

Course director and contact information: Dr. Monica Valentovic  valentov@marshall.edu  
304-696-7332

Course Description: The Clinical Pharmacology elective offers students the opportunity to research a topic of special interest to them. Students are assigned to a faculty member in the Department of Biomedical Sciences with an emphasis in Pharmacology and Toxicology for guidance and assistance throughout this elective. Projects may involve literature review or a laboratory research project. If a laboratory project is selected the student must contact the course director 2 weeks in advance of starting the elective to identify the faculty member and research project. The research may be selected from the areas of Cardiovascular, Pharmacology, Neuropharmacology, or Toxicology.

Additional Responsibilities of the Student: Participate in informal discussions of selected topic and pursue outside reading to expand learning of a topic.

Competency: Upon completion of the rotation the student should complete a literature review or report of their research findings.

Grading: Pass/Fail
